

BELZONA PROTECTS BOX GUTTERS

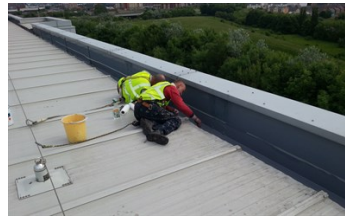

ID: 6111

Industry: Buildings & Structures
Application: RPA-Roof Problem Areas
Substrate: Plastic coated steel.
Products: * Belzona 3111 (Flexible Membrane) ,

Customer Location: Corporate Office, Teesside, UK
Application Date: 2013

Problem

The client was about to take possession of a newly constructed office block. However, the gutters were leaking at multiple points around the building and so they were refusing to take ownership until the roof was watertight. It was thought that the joints and drain points were at fault. The main contractor had tried to seal these with a bituminous coating, which was ineffective and so needed to be removed. Belzona were approached for a liquid applied solution that could be backed by a warranty.

Photograph Descriptions

- * Building front aspect ,
- * Typical gutter on initial inspection ,
- * Application of Belzona 3111 underway ,
- * Application completed ,

Application Situation

Plastic Coated Box Gutters.
