### **BELZONA TROUGH REPAIR**

ID: 635

Industry: General Industry Customer Location: Wire and cable manufacturer,

Manchester UK

Application: TCC-Tanks and Chemical Containment Application Date: June 2002

Areas

Substrate: Aluminium

Products: \* Belzona® 1341 (Supermetalglide),

#### Problem

Micro-biological fouling occurring in trough due to temperature and pitting of substrate caused by chemicals used. This was causing health and safety issues and also leaks at joints.

## **Photograph Descriptions**

- \* The problem ,
- \* The solution ,

### **Application Situation**

Trough used to treat wire in drawing and coating process

# **Application Method**

Application was carried out in accordance with Belzona Know-How System Leaflet TCC-5.

### **Belzona Facts**

Belzona gave a cost effective solution to the problem with the only other alternative being to replace all 320 meters (1050ft) of troughs. System still performing well 3 years on.
