# **BELZONA STOPS WINDOW LEAKS**

ID: 670

Industry: Buildings & Structures Customer Location: Community College, St. Charles,

Missouri USA

Application Date: August 2005

Application: RPA-Roof Problem Areas

Substrate: Concrete and steel

Products: \* Belzona® 3111 (Flexible Membrane),

**Problem** 

The bottoms of the windows had almost imperceptible openings allowing wind blown water to enter and travel to the entry canopy staining the ceiling tile.

## **Photograph Descriptions**

- \* View of windows above entry canopy.,
- \* Close up of the problem and start of the repair. ,
- \* Finished repair.,

### **Application Situation**

Persistent leaks for several years. Repairs attempted by many people had been unsuccessful.

# **Application Method**

Application was carried out in accordance with Belzona Know-How System Leaflet RPA-3.

# **Belzona Facts**

The current director of facilities had used Belzona® 3111 over 20 years ago to stop leaks around a chimney and it is still leak free, so the customer had every confidence in the chosen solution.
