

A UNIVERSITY CONDENSATE TANKS PROTECTED WITH BELZONA FOR A LONG-TERM SERVICE

ID: 7656

Industry: Heating, Ventilation & Air Conditioning
Application: TCC-Tanks and Chemical Containment Areas
Substrate: Steel
Products: * Belzona 1381 ,

Customer Location: Florida, USA
Application Date: February 2017

Problem

These tanks process hot water up to 200 degrees F. They also have some agitation that is part of their process so the coatings needed to be able to resist these criteria.

Photograph Descriptions

- * 1. One of the two condensate tanks. ,
- * 2. Application by brush. ,
- * 3. Spark Test Machine. ,
- * 4. Spark testing the finished tank. ,

Application Situation

Two new condensate tanks for a university boiler house.

Application Method

These tanks were blasted by Sponge Jet method to control dust in this closed environment. Two coats of Belzona 1381 were applied by brush. The product cured overnight and then was spark tested to detect any holidays. The application was done in accordance with Belzona System Leaflet TCC-5.
