Substrate: Concrete

Products: * Belzona 5811 (Immersion Grade) ,

Customer Location: Airport Pump Station, Florida, USA

Application Date: Fall 2017

Problem

The Customer needed a preventive protective coating against H2S damage for a newly installed concrete ring added to a pump station.

Photograph Descriptions

- * 1. Top of concrete ring for pump station well. ,
- * 2. Inside of the top concrete ring newly installed. ,
- * 3. Concrete ring after scarifying to prepare for Belzona 5811. ,
- * 4. Concrete ring coated with Belzona 5811 ,

Application Situation

A new concrete ring installed to increase the height of a pump station to prevent storm water from getting into the pump station.

Application Method

The application was carried out in accordance with a modified version of Belzona Know-How System Leaflet VPF-14. The concrete surface was prepared by scarification. Belzona 5811 was applied to the entire repair area.

Belzona Facts

Belzona was chosen for the ease of use to protect the new concrete ring.
