BELZONA
Repair • Protect • Improve

The application was carried out in accordance with a modified version of Belzona System Leaflet SOS-2. Once the areas that required repair were established and prepared via abrasive blasting, a patch repair manufactured using the Belzona SuperWrap II system, was then applied before being overcoated by Belzona 1321 (Ceramic S-Metal).

Belzona Facts

The SuperWrap II patch was specifically designed for this application to provide a cost-effective and long lasting corrosion barrier to the boat's hull, just above the waterline. The asset owner was extremely happy that the Belzona solution provides outstanding corrosion protection without the need of hot work, increasing the ease of application.
