

Belzona puts Screw Conveyor Back in action

ID: 7736

Industry: Sugar

Customer Location: Sugar Mill, France

Application: SHM-Solids Handling Machinery

Application Date: June 2018

Substrate: Carbon Steel

Products: * Belzona 1311 (Ceramic R-Metal) ,
* Belzona 1331 ,

Problem

Erosion/corrosion caused pitting damage on the screw conveyor surface. Damage due to the beets as well as rocks and gravels.

Photograph Descriptions

- * 1 - Screw Conveyor ,
- * 2 - Extend of the pitting ,
- * 3 - Rebuilding of the pitted areas ,
- * 4 - Belzona 1331 applied as a protective coating ,

Application Situation

Screw conveyor, displacing sugar beets

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet SHM-14.

Belzona Facts

The customer had carried out a trial using Belzona 1321 over a 2 years period. the coating only showed minor wear (<10% of the surface). It was therefore decided to protect the entire screw using Belzona 1331, which should provide long term erosion protection. As the installation of the screw require work involving a crane, extending the life of the screw in service in critical for this plant in order to save time and money.
