

Belzona helps in the Restoration of an Irrigation Pipeline

ID: 8049

Industry: Fluid Flow
Application: TCC-Tanks and Chemical Containment Areas
Substrate: Carbon Steel
Products: * Belzona 1121 (Super XL-Metal) ,
* Belzona 1982 (SuperWrap 2) ,
* Belzona 9381 ,
* Belzona 5821 ,

Customer Location: Italy
Application Date: May 2019

Problem

The internal walls of the pipeline were suffering from severe corrosion and wear over time. Outright replacement of the pipe wasn't an option as the pipeline was buried 10 meters below ground and embedded within a concrete structure.

then any pitted areas were filled in with Belzona 1121. A Belzona SW2 system was then fabricated to create a "pipe within a pipe" to restore the existing pipeline. Finally 2 coats of Belzona 5821 was applied over the SW2 system to provide corrosion and erosion resistance.

Belzona Facts

The Belzona solution avoided a costly and complex replacement of the system and allowed the pipeline to be put back in service within a few days. Now the plant will be able to cater to the needs of the farmers and avoid lengthy downtime in the future.
