Problem

This redevelopment of the platform is to allow the field to operate for an additional 25 years. therefore, a long term solution is required to protect the internal surface of this pressure vessel

Photograph Descriptions

* 1 General View of Vessel 2 Vessel prior to grit blasting 3 Application underway 4 Application completed ,

Application Situation

Newly fabricated air receiver is part of the Tyra redevelopment project where production is expected to recommence in July 2022 at a rate of around 60,000 boe/d, with two-thirds of the production expected to be gas and the rest oil.

Application Method

The application was carried out using a combination of standard paint brushes, Belzona applicator, and the Belzona Squeegee brush
