Problem

Severe pitting corrosion in bottom section of internal closed drain tank, due to coating failure. Metal loss in areas measured to 6-8mm deep.

Photograph Descriptions

- * Picture 1. Corroded tank bottom ,
- * Picture 2. Severe pitting corrosion ,
- * Picture 3. gritblasted surfaces and rebuilding of pits using Belzona 1111 Supermetal ,
- * Picture 4. Tank bottom coated with belzona 5811 Immersion grade. ,

Application Situation

Internal repair and coating of offshore FPSO closed drain tank.

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet TCC-5. Following gritblasting, Belzona 1111 Supermetal was used to fill all pitted areas in the tank bottom. All tank bottom surfaces were then coated in Belzona 5811 Immersion Grade.
