

LARGE HOLE IN TANK REPAIRED WITH BELZONA

ID: 877

Industry: Power
Application: TCC-Tanks and Chemical Containment Areas
Substrate: Carbon Steel
Products: Belzona® 1121 (Super XL-Metal)

Customer Location: Coal fired Power Plant, Missouri
Application Date: 2007

Problem

The tank developed a large hole in the top due to years of corrosion

Photograph Descriptions

* General view of the tank , * Surface preparation underway , * Doubler plate being positioned and bonded in place , * Completed repair ,

Application Situation

Large tank used to store river water to feed to boilers

Application Method

Tank was repaired in accordance with Belzona Know-How System Leaflet TCC-1. Doubler plate was bonded over the holed area.

Belzona Facts

No outage was scheduled that would allow the plant to replace the tank. Replacement would also have been costly and time consuming. Recent belt and shaft repairs completed using Belzona products at the plant had given the plant engineers confidence in Belzona Products.
