

External corrosion protection for valve parts

ID: 8882

Industry: Chemical & Petrochemical
Application: GSS-Gaskets, Seals and Shims
Substrate: Carbon steel
Products: Belzona 8411
Belzona 3412

Customer Location: Scotland
Application Date: July 2022

Problem

Due to onsite restrictions only manual preparation was permitted in the area. The geometry of the parts is quite complex & challenging to coat with traditional paint systems

Area taped out

1st coat of Belzona 3412 applied

Close up of application

Completed application

Application Situation

Several exposed parts on valves were in need of corrosion protection.

Application Method

The exposed steel was first prepared to a ST-2 standard. Belzona 8411 was then applied followed by two coats of Belzona 3412

Belzona Facts

By using the Belzona system it was possible to accurately coat the parts whilst minimizing any hazards to the site
