

# BELZONA® 5851 HELPS AVOIDS SHUT DOWN

ID: 904

Industry: Oil & Gas  
Application: VPF-Valves, Pipes and Fittings  
Substrate: Duplex  
Products: \* Belzona® 5851 (HA Barrier),

Customer Location: Production Rig North Sea  
Application Date: May 2007

## Problem

The loss of the original paint system exposed the pipe work to a risk of stress corrosion cracking whenever the fire protection Deluge system were tested.

## Photograph Descriptions

- \* Manifold showing weathering of paintwork ,
- \* Belzona® 5851 applied to exposed pipe work ,
- \* Belzona® 5851 applied to exposed pipe work ,
- \* Belzona® 5851 applied to the manifold ,

## Application Situation

Weathering of the original paint system on high temperature Duplex lines.

## Application Method

Application carried out in accordance with modified Belzona System Leaflet VPF-2. The pipe- work was wet-blasted to remove poorly adhering paintwork and any salts from the substrate.

## Belzona Facts

Allowing the application to be carried out whilst the platform was live meant that the platform did not have to shut down. Cost of shutdown in lost production is measured in millions of dollars a day. Testimonial received from RBG highlighting the benefits of the System.
