Application Date: January 2024

Problem

Intercooler tube sheet and end covers had corrosion due to b-metallic corrosion.

Before application

Overview of application area

Final application

Application Situation

Application was completed on unit that was outside. Customer erected tent and applied electric heat at 65 deg F.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet HEX-1 for repairing eroded-corroded tube sheets. The surface was prepared by grit blasting and the surface was washed with Belzona 9111. The tubes were plugged with rubber stoppers and Belzona 1111. The second coat of Belzona 1321 was applied in accordance with Belzona Instructions for Use.

Belzona Facts

Customer needed Intercooler up and running. Significant downtime was averted.
