

Repairing the shaft of a vintage air handler unit, aged over 50 years

ID: 9356

Industry: General Industry

Customer Location: Oshawa

Application: FBC-Fans, Blowers and Compressors

Application Date: September 2023

Substrate: Stainless-steel

Products: Belzona 1111 (Super Metal), Belzona 9111 (Cleaner Degreaser), Belzona 9411 (Release Agent)

Problem

Tackling a demanding repair job on an air handler unit presented a unique challenge: its placement in a notoriously inaccessible area rendered removal or replacement nearly impracticable as it was located at a more than 50-year-old facility.

Air handler Unit

Shaft after surface preparation

In-situ repair with 3D mold

Successful repair

Application Situation

As it was very challenging to remove the shaft for the repair, Belzona has offered in-situ repair with the use of 3D mold. By doing this, the client has shortened the air handling unit's maintenance time.

Application Method

- 3D mold
- Applicator
- Grinder

Belzona Facts

We devised a solution that conserved our client's precious time and resources by employing a smart on-site repair approach. Utilizing a 3D mold, we adeptly restored the shaft, guaranteeing its peak functionality. This project exemplifies our unwavering commitment to delivering exceptional service to our clientele.
