BELZONA SUCESSFULLY RENOVATES PUDDLE PIPES

ID: 947

Industry: *Power*
Application: *VPF-Valves, Pipes and Fittings*
Substrate: *Mild steel*
Products: ** Belzona® 1311 (Ceramic R Metal) ,*
** Belzona® 1321 (Ceramic S Metal) ,*

Customer Location: *Nuclear Power Station, UK*
Application Date: *Summer 2006*

Problem

Corrosion affects these pipes where the concrete pipe in the sea connects with the steel pipe into the power station and the previous ceramic based products had failed to give the level of protection that was needed. Very regular coating was needed to keep the situation under control.

Application Situation

Corrosion on seawater inlet pipe to cooling system for nuclear power station.

Application Method

Application carried out in accordance with Belzona System Leaflets VPF-1 and VPF-2. A 4-coat system was adopted by the power station to maximise longevity.

Belzona Facts

Trials were carried out at another power station with Belzona system pitted against two alternative suppliers (both ceramic based products). Belzona was found to be the clear winner when it came to erosion corrosion protection and therefore best value for money. Full life expectancy has yet to be determined. Due to location, full inspection is not appropriate but recent CCTV images
