Application Situation

The pump was out of service due to severe damage and the customer planned to replace it with a new pump costing over \$20,000. Belzona save the pump and put it back to service. The Belzona 1341N coating applied was also found to improve efficiency and reduce power consumption. The customer is already considering to coat all pumps.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet CEP-01 and CEP-03.

For the surface preparation, the pump was blasting to remove all the rust and contamination from the surface, achieving a minimum profile of 75 microns and Near White Metal cleanliness.
