

BELZONA REPAIRS AND PROTECTS SULPHURIC ACID BUND

ID: 963

Industry: Power
Application: TCC-Tanks and Chemical Containment Areas
Substrate: Concrete
Products: * Belzona® 4311 (Magma CR1) ,
* Belzona® 4111 (Magma Quartz) ,

Customer Location: Power Station, UK
Application Date: December 2007

Problem

Malfunction in the system caused a quantity of 98% Acid to be dropped, followed by a quantity of distilled water. The resultant exothermic reaction was so rapid it stripped the original coating off the concrete substrate throughout the containment area.

Photograph Descriptions

- * Damaged tank pad ,
- * Rebuilding with Belzona® 4111 ,
- * Rebuilding complete ,
- * Tank pad protected with Belzona® 4311 ,

Application Situation

Secondary containment for two acid tanks in the water treatment section. The top tank contains 98% Sulphuric Acid that feeds into a lower tank diluted to 10% strength, and used in the water treatment process.

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflets TCC-9 and TCC-15.
