

# BELZONA RESEATS NEW RUDDER BEARING BUSH

ID: 1027

Industry: Marine

Application: SOS-Ships and Offshore Structures

Customer Location: Dockyard, Bulgaria

Application Date: January, 2008

Substrate: Cast Iron and Bronze

Products: Belzona® 1221 (Super E-Metal)<div>Belzona® 1321 (Ceramic S-Metal)</div>

## Problem

Severe corrosion and impact wear of the bush housing resulted in annular gap between the housing and the bearing bush in excess of 8 mm.

## Photograph Descriptions

\* Severe corrosion on the housing clearly evident after blasting , \* New bearing bush with drilled injection ports and jacking bolts for alignment , \* Sealing the bottom of the bush with Belzona® 1221 , \* Injection of Belzona® 1321 completed ,

## Application Situation

Ships rudder bearing

## Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet SOS-9.

The injection of Belzona® 1321 was done through injection ports drilled in the bearing wall.

## Belzona Facts

Keeping the bush in place and insulated from the housing with Belzona provides resistance against galvanic corrosion.
