

BELZONA SEALS CHEMICAL BUNKERS FROM THE ENVIRONMENT

ID: 1187

Industry: *General Industry*
Application: *RPA-Roof Problem Areas*
Substrate: *concrete*
Products: *Belzona® 3111 (Flexible Membrane)*

Customer Location: *Fertilizer Plant, North Alabama USA*
Application Date: *1999*

Problem

Water was penetrating into the expansion joints and cracks, reacting with old fertilizer which could cause further concrete failure and chemical release into the environment.

Photograph Descriptions

* Cleaning the concrete , * Overall view of cracks conditioned with Belzona® 3911 , * Joints and cracks sealed with Belzona® 3111 , * Spraying coat of clear cladding ,

Application Situation

Underground fertilizer storage bunker

Application Method

Application was carried out in accordance with a modified Belzona Know-How System Leaflet RPA-1. Surface prepared by pressure washing then all cracks and joints sealed with Belzona® 3111 system. A coat of clear cladding was applied over the entire concrete storage area.

Belzona Facts

Caulks and RTV had failed over the years due to UV degradation. Belzona® 3111 has lasted 10 years with minor repairs due to structural movement.
