# **BELZONA 4181 TAKES THE HEAT**

ID: 1218

| Industry:               | Chemical & Petrochemical                         |
|-------------------------|--|
| Application:            | TCC-Tanks and Chemical Containment<br>Areas      |
| Substrate:<br>Products: | Concrete<br>* Belzona® 4181 (AHR Magma Quartz) , |

Customer Location: Chemical plant, Memphis, Tennessee U.S.A. Application Date: December 2007

#### Problem

Concrete was eroding away due to steam and chemical wash downs.

# **Photograph Descriptions**

- \* Overview of the rail car unloading station ,
- \* Eroded concrete in the sump ,
- \* Belzona® 4181 being troweled onto the concrete surface ,

# **Application Situation**

Rail Cars were cleaned and washed out with steam and chemicals over the railroad track and chemical sump.

### **Application Method**

Application was carried out in accordance with Belzona Know-How System Leaflet TCC-15.

### **Belzona Facts**

Previous grouts and coatings had failed due to the steam and hot water. Belzona<sup>®</sup> 4181 provides outstanding resistance to the chemicals and heat in this environment.
