Application Date: May 2005

Problem

Chemical attack inside volute and on the impeller.

Photograph Descriptions

- * Original pump after 5 years ,
- * The volute after surface preparation ,
- * The volute after coating with Belzona® 4311 ,
- * The impeller protected with Belzona® 4311 ,

Application Situation

Vertical pumps to handle sulfuric acid

Application Method

Application was carried out in accordance with Belzona System leaflet CEP-3.

Belzona Facts

Belzonas solution for acid pumps was originally tested in 1998 on a vertical pump in contact with 93% sulfuric acid. Very satisfying results led to 5 identical pumps 4 years later being protected.

Belzona 4311, designed to withstand immersion in such aggressive chemicals, once more proved that it is a very cost effective maintenance solution for equipment.
