

LARGE GEARBOX RESTORED WITH BELZONA

ID: 1719

Industry: General Industry
Application: MPT-Mechanical Power Transmission

Customer Location: Steel Plant, Kosice, Slovakia
Application Date: 2006

Substrate: Steel
Products: * Belzona® 1111 (Super Metal) ,

Problem

Wear in the bearing housing was causing vibration.

Photograph Descriptions

- * Damaged bearing housing before reconstruction ,
- * Accurate measuring for alignment was a key feature of the process ,
- * Machining after Belzona application ,
- * Completed application ready to work ,

Application Situation

Large gearbox used in production of steel plate.

Application Method

Repairs were completed in accordance with Belzona Know-How System Leaflet MPT-6. Accurate measurements were taken to enable machining to be done in-situ to an accuracy of $\pm 0.03\text{mm}$.

Belzona Facts

Conventional welding required the gear box to be out of service too long. Belzona method achieved exact alignment ensuring smooth performance of the gearbox.
