

A BELZONA SOLUTION THAT HOLDS WATER

ID: 199

Industry: *General Industry*
Application: *FPA-Floor Problem Areas*
Substrate: *Limestone block and concrete*
Products: ** Belzona® 4141 (Magma Build) ,*
** Belzona® 3111 (Flexible Membrane) ,*
** Belzona® 4111 (Magma-Quartz) ,*

Customer Location: *The University of Iowa, U.S.A.*
Application Date: *July 1997*

Problem

The concrete and stone base was badly damaged with a large number of cracks and hollowed areas. Water was leaking into underground service tunnels. Previous repairs did not last for more than one year.

Photograph Descriptions

- * Overall view of the fountain ,
- * Badly damaged concrete in the wall of the upper portion of the fountain ,
- * Putting the finishing touches on the lower fountain area ,
- * The fountain during 1999 - still trouble free ,

Application Situation

A two-level fountain

Application Method

The Application was carried out in accordance with Belzona Know-How System Leaflets FPA-1, TCC-9, RPA-6 & RPA-11.

Belzona Facts

Inspection of the fountain in late 1999 revealed that the Belzona repairs were performing as anticipated. The fountain was donated to the university by the class of 1936.
