

BELZONA® 6111 PROTECTION OF FIRE HYDRANTS

ID: 206

Industry: General Industry
Application: TCC-Tanks and Chemical Containment Areas
Substrate: Cast iron
Products: * Belzona® 6111 (Liquid Anode),

Customer Location: Municipality
Application Date: 1993 to present

Problem

Ineffective primers used during manufacture led to repetitive painting. Road salt and grit during severe winter conditions accelerates corrosion.

Photograph Descriptions

- * Hydrant with Belzona® 6111 applied ,
- * Completed application with top coat of paint applied ,

Application Situation

External surfaces of fire hydrants

Application Method

Application carried out in accordance with a modified version of Belzona Know-How System Leaflet TCC-5, before overpainting with required color top coat.

Belzona Facts

Customer carried out tests and found Belzona® 6111 to be the most effective system. Previous annual painting has been extended beyond five years.
