# **BELZONA CLAMPS DOWN ON LEAKING PIPES**

ID: 212

Industry: Oil & Gas Customer Location: Oil refinery in the Netherlands

Application: TCC-Tanks and Chemical Containment Application Date: September 2000

Areas

Substrate: Steel

Products: \* Belzona® 4341 (Magma CR4),

\* Belzona® 4301 (Magma CR1 Hi-Build),

#### **Problem**

A protective covering was needed for the clamps to withstand corrosive chemicals up to  $60^{\circ}$ C. The clamps are used to seal pipes which transport a waste by-product of the refining process.

## **Photograph Descriptions**

- \* Clamps being coated with Belzona® 4341,
- \* Clamps ready for service,

### **Application Situation**

Clamps were being used to seal leaking pipes where it is impossible to remove them from service.

#### **Application Method**

The application was carried out in accordance with Belzona Know-How System Leaflet TCC-5. Belzona® 4301 was used to smooth over the weld seams prior to the application.

# **Belzona Facts**

Prior to Belzona the customer was using an expensive fill medium to inject into the clamps as a temporary fix. The customer is very impressed with the Belzona® 4341 and plans on coating more clamps with it.
