

BELZONA REJUVENATES STEEL PLANT ACID & CAUSTIC BUNDS

ID: 2371

Industry: General Industry
Application: TCC-Tanks and Chemical Containment Areas
Substrate: Concrete
Products: * Belzona® 4131 (Magma Screed) ,
* Belzona® 4311 (Magma CR1) ,

Customer Location: Steel Plant, Teesside, UK
Application Date: 2011

Problem

The two bund areas needed complete refurbishment. Over the years acid and caustic residues had attacked the bunds and left them both badly deteriorated. The client wanted the area cleaned and protected with a material that would resist further attack.

Photograph Descriptions

- * Original condition with Acid & Caustic attack ,
- * Fillet created in Belzona® 4131 ,
- * Finished system in Belzona 4311 ,
- * Acid and Caustic bunds completed in Belzona® 4311 ,

Application Situation

Basic Oxygen Steelmaking (BOS) Demin water plant. Two bunds for regeneration chemicals - 96% sulphuric acid and 46% Sodium hydroxide.

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet TCC-15. A 25mm fillet of Belzona® 4131 was installed on internal angles before applying the Belzona® 4311 system.

Belzona Facts

The client chose Belzona due to the performance the materials offered and its ability to be applied to complex geometry as there
