

BELZONA SEALS RE-DESIGNED WORKSHOP ROOF

ID: 2486

Industry: General Industry
Application: RPA-Roof Problem Areas
Substrate: Clad Steel Roof
Products: * Belzona® 3131 (WG Membrane) ,

Customer Location: Train operator, Newcastle, UK
Application Date: September 2011

Problem

Heavy rainfall resulted in flooding within the workshop area. In addition, the drain pipes within the valley gutter were completely blocked.

Photograph Descriptions

- * Leaking Roof Area ,
- * Fabricated steel panels being installed ,
- * Belzona® 3131 applied to the panels ,
- * Total encapsulation ,

Application Situation

The clients workshop contains electric rails for the Metro Trains to come in for maintenance. Roof leaks and flooding create a hazardous environment.

Application Method

It was agreed that the rain water would be redirected into another gutter. To achieve this, panels were fabricated and riveted in place. The panels were then totally encapsulated and sealed using Belzona® 3131 applied in accordance with Belzona Know-How System Leaflet RPA-6.
