FLANGE SEALING WITH BELZONA

ID: 2785

Industry: General Industry Customer Location: Salt producer, Germany

Application: VPF-Valves, Pipes and Fittings Application Date: May 2010

Substrate: Mid Steel

Products: * Belzona® 1391 (Ceramic HT),

* Belzona® 1111 (Super Metal),

Problem

The leaking flange had to be sealed without dismantling as production could not be interupted.

Photograph Descriptions

- * Leaking flange,
- * Application of first coat ,
- * Application of second coat ,
- * Complete application,

Application Situation

Large leaking flange

Application Method

Application was carried out in accordance with an adapted version of Belzona Know-How System Leaflet VPF-11. After grit blasting, the nuts and bolts were encapsulated with Belzona® 1111 before Belzona® 1391 was applied by brush, incorporating Reinforcement Tape, to completely seal the circumference of the flange joint.
