

BELZONA SEALS SPY GLASSES IN VESSEL

ID: 3415

Industry: General Industry
Application: TCC-Tanks and Chemical Containment Areas
Substrate: Steel
Products: * Belzona® 4301 (Magma CR1 Hi-Build) ,

Customer Location: International chemical company, Spain
Application Date: April 2012

Problem

Corrosion had occurred at the spy glasses caused by the Hydrochloric acid used during the regeneration process.

Photograph Descriptions

- * Spy glass before the application ,
- * Grit blasting in progress ,
- * Surface preparation completed ,
- * Application completed ,

Application Situation

Two spy glasses in process vessel (ion exchange).

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet TCC-5. After grit blasting the surface and protecting areas where Belzona should not adhere (nuts, bolts, cover) with two coats of Belzona® 9411 (Release Agent) Belzona® 4301 applied to rebuild lost profiles, restore corrosion protection allowing the site glasses to be effectively sealed. .
