

INTERNAL COATING OF SEAWATER LIFT PUMPS

ID: 3418

Industry: Oil & Gas
Application: CEP-Centrifugal Pumps
Substrate: Carbon Steel
Products: * Belzona® 1321 (Ceramic S-Metal) ,

Customer Location: Workshop Stavanger Norway
Application Date: February 2012

Problem

Client in need of erosion/corrosion protection of the equipment due to earlier corrosion problems in similar equipment.

Photograph Descriptions

- * Grit blasted and prepared for coating ,
- * Internal coating ongoing ,
- * Internal coating completed ,
- * Overview of completed application prior to assembly ,

Application Situation

Six new seawater lift pump chambers to be internally protected prior to assembly. The pumps are used for firefighting purposes on a North Sea platform.

Application Method

Application was carried out in accordance to the Belzona Know-How System Leaflet CEP-1. Following grit blasting, the pumps were coated with 2 layers of Belzona® 1321.

Belzona Facts

Coating of the new pumps extends the lifetime of the equipment and saves future maintenance costs for the client.
