

ROUTINE REPAIR OF FLOATING HOSES WITH BELZONA

ID: 399

Industry: Oil & Gas
Application: SOS-Ships and Offshore Structures

Customer Location: Offshore Oil Production Company
Application Date: On-going since 1987

Substrate: Rubber
Products: * Belzona® 2211 (MP Hi-Build Elastomer) ,

Problem

Rubber coverings suffer regular mechanical damage and require refurbishment to maintain buoyancy.

Photograph Descriptions

- * Typical single buoy mooring system. ,
- * Repaired damage to surface of the hose. ,
- * Completed applications. ,

Application Situation

Oil transfer hoses operating between single buoy moorings and tankers.

Application Method

Application carried out in accordance with Belzona Know-How System Leaflet SOS-12. Hoses were thoroughly cleaned, roughened and then conditioned with Belzona® 2911. The damage was then rebuilt using Belzona® 2211.

Belzona Facts

The use of Belzona material in this instance prevented further damage to the hose, in particular the flotation material which if damaged may require the hose to be scrapped.
