

BELZONA FLANGE REPAIR SYSTEM SAVES MONEY

ID: 456

Industry: Oil & Gas
Application: VPF-Valves, Pipes and Fittings
Substrate: Galvanised steel.
Products: * Belzona® 1321 (Ceramic S-Metal) ,
* Belzona® 9411 (Release Agent) ,

Customer Location: Offshore Oil Company - UK North Sea
Application Date: November 2003

Problem

External corrosion on the flange faces had resulted in the hoses not being able to seal correctly and as a result were considered no longer fit for purpose.

Photograph Descriptions

- * Four floating hoses awaiting repair ,
- * Close up showing corrosion damage and plugs and shims fitted into place ,
- * Completed application, awaiting dressing down and pressure testing ,

Application Situation

Flange faces on 16", 300lb crude oil transfer hoses

Application Method

A procedure based around Belzona Know-How System leaflet VPF-9 was used to reform the flange faces.

Belzona Facts

The four hoses shown in the picture represent a cost to the customer if replaced of approximately £100,000 (\$160,000). All four hoses were effectively covered and tested to 18 bar according to International (OCIMF 1991) and Dunlop Oil & Marine Test Guidelines. This was done for a fraction of the cost of replacement hoses.
