

BELZONA PROTECTS TANK ROOF WITH MINIMAL EFFORT

ID: 4723

Industry: Chemical & Petrochemical
Application: TCC-Tanks and Chemical Containment Areas
Substrate: Carbon steel
Products: * Belzona® 5831 (ST Barrier) ,
* Belzona® 9211 (SuperGrip Aggregate) ,

Customer Location: Petrochemical Plant, UK.
Application Date: 2013

Problem

Roof of chemical tank was suffering severe corrosion but due to the highly explosive nature of the tanks contents, no hot works or mechanical tools could be used. The customer wanted an anti corrosion system that would bond with minimal preparation and be flexible enough to move with the tank. As the whole roof is subject to regular inspections, they also wanted a system that could offer good traction under foot on this domed surface.

Photograph Descriptions

- * Chemical tank of 29m height ,
- * Corroded domed roof ,
- * Application of Belzona® 5831 with Belzona® 9211 in the top coat ,
- * Phase 1 completed ,

Application Situation

Chemical Tank Roof.

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet TCC-5. Preparation was limited to hand wire brushing. 2 coats of Belzona 5831 were applied with Belzona® 9211 broadcast into the surface to create a positive grip..

Belzona Facts

Phase 1 of this project on the main roof dome covered 540m2 and included many pipes and gantry legs. All were prepared with

hand tools to eliminate the possibility of sparking. Belzona 5831 offered a solvent free solution with excellent adhesion. With the Belzona 9211 incorporated, it afforded assured grip, even in wet conditions. The client was delighted with the results and is due to repeat the application on other parts of the site.
