

# BELZONA PROTECTION TO FLANGE EDGES ON GLASS LINED PROCESS VESSELS

ID: 4735

Industry: Chemical & Petrochemical  
Application: TCC-Tanks and Chemical Containment Areas  
Substrate: Mild Steel  
Products: \* Belzona 1392 (Ceramic HT2),

Customer Location: Chemical Plant, South Wales, UK  
Application Date: 2012

## Problem

External flange edge corrosion preventing correct sealing of the vessels.

## Photograph Descriptions

- \* Preparation of habitat, product and equipment prior to coating procedure ,
- \* Substrate condition following grit blast preparation ,
- \* Completion of first coat colour coded grey ,
- \* Completion of second coat colour coded red ,

## Application Situation

Glass lined process vessels used in the manufacturing process.

## Application Method

Application was carried out in accordance with Belzona System Leaflet TCC-3. Specific attention had to be given to the grit blasting and application to ensure damage was not caused to glass lining. The coating must align perfectly to the full circumference of the glass lining in the vessel.
