

BELZONA STOPS DAMAGE FROM PITTED CHOCKS

ID: 48

Industry: Marine
Application: SOS-Ships and Offshore Structures

Customer Location: Oil tanker, Pacific Northwest, U.S.A.
Application Date: 1998

Substrate: Steel
Products: * Belzona® 1311 (Ceramic R-Metal) ,

Problem

Chocks pitting and the roughness was destroying the hawsers.

Photograph Descriptions

- * Close-up of chock with peeling paint. ,
- * View of chock showing extensive pitting. ,
- * Surface preparation in progress. ,
- * Finished application. ,

Application Situation

Pitted chocks

Application Method

Application was carried out out in accordance with a modified version of Belzona Know-How Leaflet SOS-19.

Belzona Facts

Ship's mooring lines (hawsers) are very expensive. The steel casting for the chocks became pitted from the salt. This caused jagged edges which wore out the hawsers prematurely.
