Problem

Worn shaft due to bearing failure

Photograph Descriptions

- * Initial damage ,
- * Surface Preparation ,
- * Molding Belzona 1111 ,
- * Complete application ,

Application Situation

Dragshaft repair with an interference fit of 0.005-0.008”

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet MPT-10. A mold was made at a local machine shop, clamping on the seal surface and utilizing the window between the bearings as the second locator point.

Belzona Facts

Shaft repairs of any size can be molded in place, thus reducing downtime. Savings to the client was estimated to be around \$350,000.
