BELZONA PROTECTS INTERNAL BASE OF SEPARATOR

ID: 490

Industry: Chemical & Petrochemical Customer Location: Oil Refinery-Australia

Application: TCC-Tanks and Chemical Containment Application Date: May 2004

Areas

Substrate: Steel

Products: * Belzona® 1591 (Ceramic XHT Metal),

Problem

Internal erosion corrosion in lower section of separator.

Photograph Descriptions

- * Base of vessel grit blasted,
- * Stripe coating of welds carried out,
- * Completed application,

Application Situation

Accumulator water separator contains low octane gasoline, small amounts of H2S, ammonium bisulfide and water. Temperature up to 160°C.

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet TCC-5. After thorough cleaning, the vessel was grit blasted and coated with the Belzona® 1591 taking care to initially stripe coat around the attachment bracket welds.

Belzona Facts

Belzona coatings have a proven track record in similar environments being capable of withstanding the temperatures, pressure cycling, erosion and corrosive environment found in such equipment.
