

BELZONA REPAIRS AND PROTECTS SX/EW TANKHOUSE CELL

ID: 4931

Industry: *Mining & Quarrying*
Application: *TCC-Tanks and Chemical Containment Areas*

Customer Location: *Copper Mine, Arizona*
Application Date: *2011 - 2013*

Substrate: *Polymer concrete*
Products: ** Belzona 4111 (Magma Quartz),*
** Belzona 4341 (Magma CR4),*

Problem

Polymer concrete SXEW process cells had been experiencing cracking which caused leakage of copper sulfate electrolyte solution. The furniture rails which suspend the copper anode plates were experiencing resin burnout from heat transfer through the cathodes.

Photograph Descriptions

- * Overview of the tankhouse cell ,
- * Furniture rails repaired with Belzona 4111 ,
- * Tankhouse cell protected with Belzona 4341 ,
- * Tankhouse cell protected with Belzona 4341 ,

Application Situation

Copper mine SX/EW processing tankhouse was experiencing numerous process and maintenance problems due to sulfuric acid attack at 120°F.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet TCC-3. The cell surfaces were prepared by a combination of grit blasting and grinding. Then the furniture rails were formed and repaired with Belzona 4111. Finally Belzona 4341 was applied monolithically to prevent further damages.
