Application Situation

Bearing shaft.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet FBC-13 for repairing shafts by forming techniques. The surface was prepared by mechanical grinding and cleaning with Belzona 9111 to remove all residue. The former's interior was prepared with Belzona 9411. Belzona 1111 was applied to the shaft and former, and the former was installed on the
