

BELZONA SAVES HEAT EXCHANGER FROM COSTLY REPLACEMENT

ID: 5219

Industry: Heating, Ventilation & Air Conditioning

Customer Location: Alaska, USA

Application: HEX-Heat Exchangers

Application Date: 1983

Substrate: Stainless Steel

Products: * Belzona 1311 (Ceramic R-Metal) ,

* Belzona 1321 (Ceramic S-Metal) ,

Problem

All ten heat exchangers had been replaced just one year ago. The covers were stainless steel but were welded with a carbon steel rod, setting up electrolysis. Replacements would take more than 3 months to build and a cost of downtime at \$70,000.00 per day. With Belzona, all ten were rebuilt in just seven days. They were opened one year later and the heat exchangers were found to be in perfect condition.

Belzona Facts

The alternative was ten new heat exchangers costing over \$500,000.00 plus several millions of dollars in downtime. Instead, all of the ten heat exchangers were rebuilt in seven days with Belzona, costing only \$15,000.00.
