

BELZONA REPAIRS HIGH VOLTAGE BREAKER

ID: 5233

Industry: Power

Customer Location: New England, USA

Application:

Application Date: Summer 2010

Substrate: Cast Aluminum

Products: * Belzona 1111 (Super Metal) ,

Problem

The aluminum casting on a SF6 High Voltage Breaker cracked, causing coolant to leak out and create a dangerous operating situation. Dismounting and replacing the breaker was not an option as no spare breaker was available for months.

Photograph Descriptions

- * Overview of the converter station ,
- * The leaking area ,
- * Completed surface preparation ,
- * Completed application ,

Application Situation

SF6 High Voltage Breaker.

Application Method

The surface preparation was carried out with a hand tool grinder and the application was done in accordance with Belzona Know-How System Leaflet TCC-1.

BELZONA®
Repair • Protect • Improve

Outages are scheduled months in advance and require Grid operator approval. The station was in a scheduled outage when the leak was discovered. No replacement was immediately available so Belzona 1111 was used to get the plant back on-line on schedule, thus saving thousands of dollars.
