Application Date: May 2014

Problem

Waste was causing chemical attack so the customer wanted a coating to protect the flooring.

Photograph Descriptions

- * Prior to application ,
- * Preparation in progress ,
- * Completed application ,

Application Situation

Garbage room floors in a mall.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet FPA-3 for protecting floors and drains against chemical attack. The floor was prepared for coating using a floor sander to remove any existing coating, dirt and debris and abraded to expose the aggregate. Belzona 5231 was applied using a medium nap roller in accordance with Belzona Instructions For Use.

BELZONA[®]
Repair • Protect • Improve

The customer had already used Belzona 5231 in the garbage rooms of the mall and was really pleased and asked for this garbage room to be coated also. Belzona 5231 is a two-component, liquid applied coating system designed for floor areas where chemical, abrasion and slip resistance is required.
