

# SLIPPERY FLOOR DRAIN GETS BELZONA GRIP!

ID: 5407

Industry: Buildings & Structures

Application: FPA-Floor Problem Areas

Substrate: Concrete

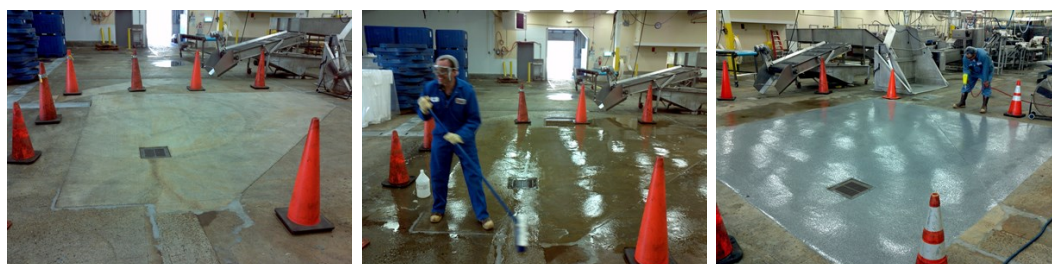

Products: \* Belzona 5811 (Immersion Grade) ,  
\* Belzona 9211 (Supergrip Aggregate) ,

Customer Location: Bellingham, WA, USA

Application Date: March 2013

## Problem

Concrete floor area around drain is very slippery with water & fish entrails. area sees both forklift and pedestrian traffic

## Photograph Descriptions

- \* Floor drain before the application ,
- \* Thorough cleaning ,
- \* Non-slip application of the floor drain is now complete ,

## Application Situation

The Customer needed a safety grip system for a slippery floor drain area in fish processing plant to avoid falls & injury

## Application Method

The application was carried out in accordance to Belzona Know-How System Leaflets FPA-3 and FPA-8. Concrete cleaned thoroughly and one heavy coat of Belzona 5811 applied to floor area. Belzona 9211 (Supergrip Aggregate) was then broadcast onto uncured material to create an aggressive non-slip surface.
