- * Prepared surface for the application of Belzona 1131 ,
- * Application of Belzona 1131 ,
- * Completed shaft repair ,

Application Situation

Deteriorated drive shaft on four high rolling mill.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet MPT-1.

Belzona Facts

The repair was carried out in-situ, minimizing transportation and downtime associated costs. The cost of the application was significantly lower compared to traditional repair methods such as overlay welding. The Belzona repair has proved to last for 12 years since the first application in 1998, therefore, when additional maintenance was required in 2010, Belzona was the first choice for the client.
