Photograph Descriptions

- * General view of the damaged pillars ,
- * Installation of the forms to the pillars after cleaning ,
- * Application of Belzona 4111 ,
- * Wagons operating on the repaired pillars ,

Application Situation

Recovery of 48 pillars.

Application Method

The pillars were first cleaned with a water jet and steel brush. The leveling of the pillars was carried out with the assistance of a topography tool and then Belzona 4111 and Belzona 4151 were applied. The application was carried out in accordance with Belzona Know-How System Leaflet TCC-9 and FPA-1.

Belzona Facts

4 hours after the application of Belzona, the tracks were installed, and 8 hours after the application, the cargo train was released for operation. Upon completion of the application with Belzona Technology, the railway was cleared for operation within little time.
