

BELZONA CRUISE SHIP CENTRIFUGAL PUMP

ID: 56

Industry: Marine

Customer Location: Italian Cruise Ship in a Southern California Shipyard, U.S.A.

Application: CEP-Centrifugal Pumps

Application Date: December 1996

Substrate: Bronze

Products: * Belzona® 1311 (Ceramic R-Metal) ,
* Belzona® 9411 (Release Agent) ,

Problem

Severe erosion/corrosion damage, evidenced by more than a dozen small holes, and one large hole completely through the casing as well as a loss of up to two inches of the cutwater. The wear ring seats were also eroded in the same area.

Photograph Descriptions

- * The pump casing and cutwater after blasting and fitting with expanded metal mesh. Note the hole at the center of the cutwater. ,
- * Belzona® 1311 (Ceramic R-Metal) being pressed through the mesh and into the surface profile of the bronze. ,
- * The finished application. Repaired cutwater edge and casing holes. The seal area and rebuilt seating groove is on the right. ,

Application Situation

Main circulating water centrifugal pump

Application Method

Application was carried out in accordance with modified versions of Belzona Know-How Leaflets CEP-1, CEP-2, and CEP-6.

Belzona Facts

The ship was in process of being sold and without this quick repair (completed over a weekend), the multi-million dollar sale would have been cancelled. Replacement costs were approximately \$10,000, with extensive downtime.
