# BELZONA EXTENDS THE LIFE OF A CLEANER HEAD CONE

ID: 5659

Industry: Pulp & Paper Customer Location: Paper Mill, Northern Texas, USA

Application: SHM-Solids Handling Machinery Application Date: 2014

Substrate: Steel

Products: \* Belzona 1311 (Ceramic R-Metal),

\* Belzona 1812 (Ceramic Carbide FP),

\* Belzona 9811,

#### Problem

The cleaner head was worn out after 4 months due to the highly abrasive environment. The paper mill wanted the head to last longer.

## **Photograph Descriptions**

- \* Erosion damage to the head,
- \* Interior rebuilt with Belzona 1812,
- \* Installation of Alumina Tiles,
- \* Completed repair,

## **Application Situation**

Cleaner head at a paper mill.

## **Application Method**

First, the head was properly blasted. The application was carried out in accordance with Belzona Know-How System Leaflet SHM-7. The contour area was rebuilt with Belzona 1812. Belzona 1311 was used as an adhesive to bond the tiles to the head, and Belzona
