# Belzona Spruces Up Steps at a Condominium and Protects from UV

ID: 6327

Industry: Buildings & Structures Customer Location: Toronto, Ontario, Canada

Application: FPA-Floor Problem Areas Application Date: July 9th, 2015

Substrate: Concrete

Products: \* Belzona 4131 (Magma Screed),

\* Belzona 4411 (Granogrip),

\* Belzona 4911 (TX Conditioner) ,

\* Belzona 5231 (SG Laminate),

\* Belzona 5233 ,

#### Problem

The existing coating that was applied was not UV resistant and had changed color (yellowed) due to exposure from ultra violet light. Additionally removal of ice build up with a s hovel had damaged the coating allowing corrosion of the concrete substrate.

## **Photograph Descriptions**

- \* 1. Damaged steps ,
- \* 2. Damage repaired with Belzona 4131,
- \* 3. Application of Belzona 5231 and 4411,
- \* 4. Completed application of Belzona 5233 and contrasting 4411 grip system.,

#### **Application Situation**

The side entrance to two towers at a large condominium complex were suffering safety issues and aesthetically unpleasing look of their existing floor coating on a flight of steps.

#### **Application Method**

The application was completed by following Belzona Know How System Leaflets FPA-01 and FPA-08. Preparation of the concrete and existing coating was completed by pressure washing and removing any loose, flaking concrete and coating. The surface was abraded to ensure optimum adhesion. The localized damage was repaired using Belzona 4911 and Belzona 4131. A base coat of Belzona 5231 (with Aggregate) in light grey color was applied to all surfaces. Application of a step edge grip system was completed to current code using Belzona 4411 and Belzona 9211 to provide safety and visual contrast. A final coating of Belzona 5233 was then applied to provide aesthetically pleasing finish and UV resistance.
