- * Application situation ,
- * A traditional repair which had holed again ,
- * The Belzona repair ,

Application Situation

Forked Ash Pipe

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet VPF-11.

Belzona Facts

Every few weeks some of these pipes become holed and are traditionally welded. Welding these pipes is typically very difficult and after a very short time the problem reappears at the same point. After the application of the Belzona® solution at 30-40mm along with steel plates the problem stopped. By January 2006 there had been many of these repairs completed and none had become
